

Instructions to run Batch file :

- 1) Open Command Prompt and type 'python' to check if python is already installed or not.

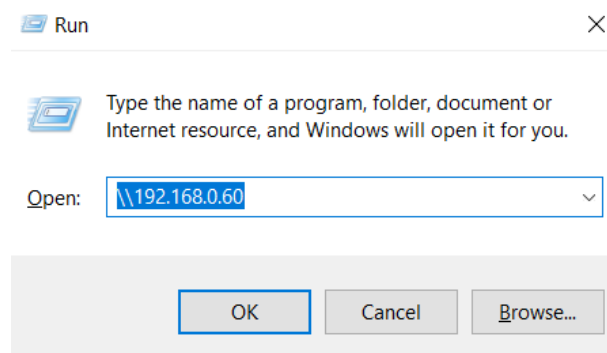

```
Administrator: Command Prompt - python
Microsoft Windows [Version 10.0.17763.3770]
(c) 2018 Microsoft Corporation. All rights reserved.

C:\Users\Administrator>python
Python 3.11.1 (tags/v3.11.1:a7a450f, Dec 6 2022, 19:58:39) [MSC v.1934 64 bit (AMD64)] on win32
Type "help", "copyright", "credits" or "license" for more information.
>>> _
```

If it's already installed, first uninstall it.

- 2) Then go to <https://www.python.org> and download the Python version 3.11.1 and install it on system.
- 3) Click Windows Key + R and type [\\192.168.0.60](https://192.168.0.60) then click Enter.

- 4) Go to the shared folder (Prod_Deployment) and extract the zip files in the same location.
- 5) After extraction
 - a) First, go to the "hr_mail" folder and run Setup.bat

```
C:\Windows\system32\cmd.exe
'\\192.168.0.25\UAT_Deployment\hr_mail'
CMD.EXE was started with the above path as the current directory.
UNC paths are not supported.  Defaulting to Windows directory.

C:\Windows>REM To select copy location

C:\Windows>set /P env_dir_path="Enter your directory name, (eg. C\User\'Your Directory Name') : "
Enter your directory name, (eg. C\User\'Your Directory Name') : Administrator_
```

And enter the directory name as in the picture. And hit enter.

- b) Then, go to the “dly_mail” folder and run Setup.bat
Enter Directory Name in the prompt same as before
- c) Finally, go to the “supp_automation” folder and run Setup.bat
Enter Directory Name in the prompt same as before
